

## Project Demo Planning

### demonstration of proposed features

Date	23 November 2023
Github name	<a href="https://github.com/Bhuvaneswari900/Salesforce">https://github.com/Bhuvaneswari900/Salesforce</a>
Project Name	property management application

### demonstration of proposed features

#### Feature:

Automated Rent Collection Demonstration: Showcasing the system's ability to automate rent collection through various payment methods, providing convenience for both landlords and tenants.

#### Maintenance Request Tracking Demonstration:

Highlighting how the application efficiently tracks and manages maintenance requests, including a user-friendly interface for tenants to submit requests and property managers to prioritize and resolve them.

#### Financial Performance Dashboard Demonstration:

Presenting a comprehensive financial performance dashboard that includes key metrics such as rental income, expenses, and profit/loss over a specified period. This feature aids property owners in making informed decisions.

#### Tenant Communication Portal Demonstration:

Showcasing a centralized communication portal for tenants and property managers, facilitating easy and transparent communication regarding lease agreements, announcements, and issue resolutions.

**Document Management System Demonstration:**

Illustrating the application's document management system, allowing users to securely store and access important property-related documents such as leases, inspection reports, and legal agreements.

**Property Occupancy Analytics Demonstration:**

Displaying analytics and visualizations that provide insights into property occupancy rates, trends, and projections. This feature assists property managers in optimizing rental strategies. Emphasizing the mobile accessibility of the application, showcasing how
